RealTime-приложения в Perl

Вячеслав Тихановский (vti)

2013-12-21

real-time web

Client -> Server
Client <- Server

Client <-> Server

HTML5 WebSocket
HTML5 EventSource
Flash
BOSH
Comet

HTML5 WebSocket

```
var ws = new WebSocket('ws://localhost');
ws.onmessage = function(e) {
   var message = e.data;
   alert('Got new message: ' + message);
};
ws.send('Hello, world!');
```

Разные версии WebSocket RFC 6455 draft-ietf-hybi-17 (latest) draft-ietf-hybi-10 draft-ietf-hybi-00 (with HAProxy support) draft-hixie-75

```
Draft #75
Chrome 5
Safari 5.0
Android 2.x
Draft #76
Firefox 4b (disabled)
Safari 5.0.2
Chrome 6-13
Opera 10.70 (disabled)
      4 2
iOS
Draft #10
Eirefox 10
```

Firefox 10 Chrome 14

Проблемы с прокси-серверами REQ HEADERS <-> RES HEADERS REQ BODY <-> OK

Protocol::WebSocket rocks!

Когда нет WebSocket

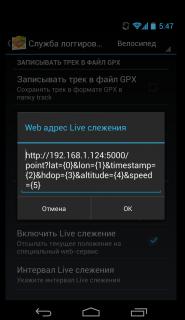

Flash https://github.com/gimite/web-socket-js Требуется policy server (843 port or inline) Fliggy

Socket.IO http://socket.io/ PocketIO SockJS https://github.com/sockjs/sockjs-client SockJS-Perl

Пример

showmetheshell

show metheco.de: 5000
